DETAILED ACTION

Claim Objections

1. Claim 12 is objected to because of the following informalities: on line 5, before “surface”, --attachment-- should be inserted for the consistency with the “external attachment surface of said accessory” on line 7. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Batting (WO 02/51203).

Batting teaches a communication of a head worn communication device or the hearing aid device (1, 2, 3, 4) and an accessory (5) which can be removably attached to the communication device. The communication device (1, 2, 3, 4) has a battery lid (4, figure 2, page 4, lines 30 and 31) and provides an external attachment surface which defines a cut out region (6, 7, figure 2) and mounts electrical connectors (page 5, lines 12-16). The accessory (5) has an external attachment surface with a protruding part (9) and mounts electrical connectors (10). As shown in figures 1-3, the external attachment surface of the accessory (5) is positionable against the external attachment surface of the communication device and slidable there along such that the protruding part (9) will fit within and be gripped by the cut out region (6, 7), and the

electrical connectors (10) of the accessory (5) will simultaneously contact the electrical connectors of the communication device (also see page 5, lines 7-16).

Response to Arguments

4. Applicant's arguments with respect to claim 12 have been considered but are moot in view of the new ground(s) of rejection.
